PROFESSIONAL SUMMARY

Results-driven Backend Developer with 5+ years of experience building scalable, high-performance systems. Proficient in Python, TypeScript, and Rust, with expertise in frameworks like Django, Flask, Anchor, and NestJS. Proven track record in delivering end-to-end solutions that drive efficiency and innovation, with strong leadership and team collaboration skills.

TECHNICAL SKILLS

- Languages: Python, TypeScript, Java, Rust, Yaml,
- Frameworks: Django, Flask, Anchor, NestJS, Actix
- Tools & Technologies: Tailwind CSS, Docker, Bash, Git, MongoDB, PostgreSQL
- Specialized Skills: RESTful API Development, CI/CD, Microservices, Cloud (AWS/GCP)

EXPERIENCE

BACKEND & CLOUD ARCHITECT | KINDLEPATH DIGITAL INITIATIVE

Africa (Hybrid) | Mar 2026 – Present

- - Architecting scalable cloud-native backend systems and digital infrastructures
- - Designing secure APIs, databases, and deployment workflows for enterprise applications.
- - Managing cloud environments, automation pipelines, and system reliability
- - Driving backend optimization, scalability, and infrastructure efficiency

CORE DEVELOPER (CONTRACT)) | PYRAX LLC

Remote | Mar 2026 – Present

- - Developing scalable blockchain-based backend systems and decentralized applications
- - Building secure and efficient Web3 infrastructures that powers the Pyrax chain.
- - Designing high-performance backend architectures using Rust and modern blockchain technologies
- - Collaborating on smart infrastructure development and decentralized ecosystem growth

CHIEF OPERATIONS OFFICER | NASZAT LABORATORIES

Abuja, Nigeria (Hybrid) | Jul 2025 – Present

- - Leading operational strategy and execution across technology initiatives
- - Overseeing product development workflows and cross-functional team coordination
- - Managing technology project delivery across education, fintech, and digital infrastructure sectors
- - Optimizing operational processes to improve scalability, efficiency, and performance
- - Coordinating partnerships, ecosystem growth, and strategic business operations
- - Driving the development of impactful technology solutions across Africa

Software Engineer (Contract) | Corestream Nigeria

Plateau, Nigeria | Mar 2025 – May 2026

- - Participated in all system architecture and design decisions during the course of the contract
- - Built scalable systems as needed across both the frontend and backend domain.
- - Prepared all built system for deployments properly by effectively writing the ci/cd workflows and making key technical decisions on it
- - Lead and mentored team of developers across the full stack domain
- - interacted and liaised with team on key technical decisions
- - Ensured availability of systems deployed and setup proper recovery mechanisms in case of failure or attacks.
- - Ensured all basic security risks are mitigated and systems are tested against common risks as in awareness docs like Owasp.
- Ensured secure coding practices and enhanced the used of standard Software development standards

Software Development Partner | Startup Jigawa

Jigawa, Nigeria | May 2024 – February 2026

- - Led the development of critical systems for state ministries, including Agric Loan and Health Reporting Systems.
- - Supervised software training programs and managed in-house products.
- - Collaborated with stakeholders to align projects with business goals.
- - Lead a team of 7 -10 developers in managing the internal company products and also delivering client projects

- - Worked on System designs and system architecture while maintaining best and highest industry standards as possible.

Software Developer (Hybrid) | Insolify

Abuja, Nigeria | Mar 2024 – May 2025

- - Contributed to in-house products, managing frontend and backend development.
- - Designed, developed, and optimized diverse software solutions in cross-functional teams.

Product Lead & Developer | Veladao Crowdfunding Platform

Jul 2024 – Oct 2024

- - Spearheaded the Solana blockchain-based platform with milestone-based donations using Sol and USDC.
- - Integrated governance features and an impact reporting system.

Software Developer (Freelance) | FS-Scholarship Loan Software

Aug 2023 – Dec 2023

- - Built scalable backend systems using Django and TypeScript.
- - Enhanced UX with dynamic Tailwind CSS interfaces and optimized development workflows using Bash.

Web Developer | Naszat Ideal Concepts Ltd

Plateau, Nigeria | Sep 2021 – Mar 2023

- - Developed responsive websites and a CMS using React, SASS, and MongoDB.
- - Designed RESTful APIs to ensure seamless integrations for client applications.

Python Developer | Corestream Nigeria

Plateau, Nigeria | Mar 2023 – May 2023

- - Trained team members on Python best practices.
- - Led a microservices-based architecture transition for improved deployment.

EDUCATION

Bachelor's Degree in Computer Science
Federal University Dutse (Expected 2026)

CERTIFICATIONS

- Udacity Full-Stack NanoDegree (ALX Scholarship) – 2021
- Backend Specialist (Coursera) – IBM, AWS

KEY PROJECTS

- - Veladao Crowdfunding Platform: Developed a blockchain-based platform enabling milestone-based donations with governance features.
- - Custom CMS Development: Led the development of a CMS, increasing client efficiency by 50%.
- - Agric Loan System: Created a loan management system for the Ministry of Agriculture, improving transparency.
- - Health Reporting System: Designed a platform for health data collection and analysis.
- - Invest Jigawa Webapp: Developed a secure application for public-private partnerships.

SOFT SKILLS

- Leadership and Team Management
- Strategic Problem-Solving
- Effective Communication
- Adaptability and Continuous Learning
